

CONSUMABLE HC8200 FOR SPARKULAR miniFALL

HC8200 is granulated alloy which is designed and produced by SHOWVEN, used on SPARKULAR series machine to generate sparks effects. The component are metal, thus ensure the safety during transportation, storage and usage. For different application scenario the consumable for SPARKULAR miniFALL divided into two types: HC8200 MEDIUM, HC8200 LARGE.

Features

Granulated alloy, non-hazmat for storage;
DMG tested, can be shipped by air/sea;
RoHS certified, environmental friendly.

Specifications

Package

200g/bag, Aluminum foil vacuum package.
12bags/box, 12boxes/carton.

HC8200 consumption

Around 15g/min

FALL Length

HC8200 MEDIUM: 2.0-3.0m

HC8200 LARGE: 3.0-4.0m
